Need to create a new form for Delivery Date & Message as per the example below. The Floral Frog plugin will detect the delivery date and recipient message fields and import them with the order.

The screenshot displays the WordPress admin dashboard with the 'Delivery Date and Message' form builder interface. The left sidebar shows the 'Products' menu highlighted in blue, and the 'Custom Product Options' sub-menu is highlighted with a red box. The main content area shows the form builder with the following sections:

- Order before 2 pm for SAME DAY delivery We deliver flowers to DA* & BR* Postcodes only**
- Separator**
- Delivery Date:** * Enter the date you would like your order delivered. The input field shows 'dd/mm/yyyy' and a calendar icon.
- What would you like to say?** Enter your personal message to the recipient here. The input field contains 'Personal Message to Recipient'.
- Special Instructions** Any special requirements? The input field contains 'Any special requirements?'.
